Progress Achieved

- | | |
|---|---|
| ☒ Pain Reduced | ☒ Range of Motion Improved |
| ☒ Strength Improved | ☒ Functional Activities Improved |
| ☒ Posture Improved | ☒ Balance / Coordination Improved |
| ☒ Goals Achieved | |

Outcome at Discharge

Full active range of motion restored (Abduction 170°, ER 75°), pain decreased from VAS 8/10 to 1/10.
Functional independence achieved.

Home Exercise Program / Advice

Continue shoulder pendular swings, wand stretches, and rotator cuff strengthening exercises with light band 3 times per week.

Follow-up Recommendations

- ☒ Follow-up only if symptoms recur
- ☒ Review after **4 weeks** if needed
- ☒ Continue Home Exercise Program

Discharge Status

- ☒ Successfully Discharged

Remarks:

Patient was compliant with therapy sessions and achieved excellent functional recovery. Advised to maintain active lifestyle.

Sincerely,

Dr. Rashmita Signature
